

San Francisco Bay Area APC Training

How to Implement the SF Bay Area APC Toolkits for Preparedness Planning

September 23, 2010
9am – 4pm
Berkeley, CA

School of
Public Health

UNIVERSITY OF CALIFORNIA, BERKELEY
Center for Infectious Diseases & Emergency Readiness

NACCHO

National Association of County & City Health Officials

San Francisco Bay Area APC Training
127 Dwinelle Hall, UC Berkeley Campus
Thursday, September 23, 2010 from 9am – 4pm

Learn how two new APC Toolkits can guide and assist your local health department in preparing for and responding to infectious disease emergencies. You can attend one or both sessions:

***Infectious Disease
Emergency Response
(IDER) Toolkit (9am - 12pm)***

The IDER Toolkit provides one core, over-arching plan for all infectious disease emergencies, and offers operational guidance and customizable tools to quickly develop or enhance your own IDER plan.

***Seasonal & Pandemic Influenza
Vaccination Assessment
(SPIVA) Toolkit (1pm - 4pm)***

The SPIVA Toolkit is a how-to guide on conducting community assessments (including surveys) as a preparedness tool. Findings will inform planning, marketing, and risk communication activities.

Registration is free, but enrollment is limited. Please register by Monday, September 20th. To register or for more information, please contact Jeannie Balido at 510.643.4930 or jybalido@berkeley.edu.
